Hi Alan: This spreadsheet is very confusing, but I'm told the final version is the one dated "4-10," which includes a biosafety cabinet for the STD lab. See Leo's message below about preparing to buy equipment. Thanks, Linda

Subject: BT Rollover

Please be aware that once the BT rollover is approved there will not be a lot of time left to put together your equipment orders. I suggest that based upon the last equipment list that you do your research and have your orders ready to go. I would say that it is particularly important for the large dollar items. Attached is the latest list.
